

Personal Benefits on City Water and Sewer:

- 1 - Lower your overall fresh water usage**
- 2 - Lower your water bill (gains grow every year as water rates rise)**
- 3 - No watering restrictions (irrigate as greywater is produced, usually morning or evening which is the best time to water)**
- 4 - Less chemicals on you (greywater reuse raises your awareness about the chemicals we use on ourselves or our laundry)**
- 5 - Less harsh cleaning chemicals used in your home (greywater reuse raises your awareness about the harshness of the cleaning chemicals we use in our home)**
- 6 - Lower temperature by prioritizing trees for watering with greywater**
- 7 - Lower temperatures reduce evaporation letting the landscape absorb and hold more water.**
- 8 - Greywater has more beneficial nutrients than tap water.**
- 9 - City water has chemicals present from treatment (put less chemicals on your plants)**
- 10 - Enjoy planting new plants without the guilt of using more fresh water (get back to gardening)**
- 11 - Lower temperatures mean less energy used to cool your home (lower electric bill)**
- 12 - Keep up your curb appeal and property value with a beautiful yard, and a more sustainable home.**
- 13 - Add value to your investment every year as water and energy rates rise every year.**
